The first challenge was identifying which members (of the very many Pennys in North East Scotland) are in a direct line from me, as far back as records show, to create a family tree from a forest of Penny names. Prime sources were - Floer's 'O' Scotland (for detail on the First 6 Penny Generations), cousin (several times removed) Laura Bozzay (for much valuable data linking current descendants with their forebears) and, to find the otherwise elusive earliest start point, the Penny-Cobban family web site (with the Auchterarder connection of 1658 and Christian Knight born 1695). A complete picture dated back over 233 years emerged - the previous 129 years has some gaps; not bad though!
